FICTIONAL / GUIDED DEMO — Aftershock parsing fixture (not real research)

On the Persistence of Fixtures in Local Test Suites (Fixture)

Local test suites often rely on small synthetic documents to exercise text-extraction pipelines. This fixture is one such document: it was written entirely offline and describes no real study, dataset, or result. Its sentences are intentionally plain so that layout artifacts do not distract from extraction behavior.

For reference, the primary fictional identifier used by this fixture is 10.5555/aft-fixture-001, which appears again in the reference list below.
